Teacher: 3

Signature: _____ 4

Subject/s: 5

Observer: 6

Signature: _____ 7

Grade: 8

Observation Date: 9

Post Meeting Date: 10

*This observation rubric will be used for Q-comp observations conducted in accordance with Q-Comp. The results of the observation are not to be construed as a summative evaluation. The results of each observation are considered, though, in the summative evaluation process. 11

PERFORMANCE RUBRIC I ¹
Planning and Preparation

Performance Levels ²

Criteria	Beginning	Developing	Applying	Innovating
A. Demonstrates appropriate knowledge of content and pedagogy	Teacher displays minimal knowledge of the content, background knowledge or of pedagogical issues.	Teacher displays basic content knowledge and some awareness of background and pedagogical knowledge, but does not anticipate student misconceptions.	Teacher displays solid content knowledge and makes connections between the content and other parts of the discipline. The teacher’s pedagogical practices reflect current research on best practices within the discipline.	Teacher displays extensive content knowledge, with evidence of continuing pursuits of such knowledge. Teacher implements a repertoire of pedagogical practices based on current research.
Evidence:				
B. Demonstrates knowledge of Students	Teacher demonstrates little or no knowledge of students’ backgrounds, skills, abilities, or interests; and doesn’t use this information in planning.	Teacher demonstrates partial knowledge of students’ backgrounds, skills, interests, and abilities and attempts to use this in planning for the class as a whole.	Teacher demonstrates thorough knowledge of students’ backgrounds, skills, interests, and abilities and attempts to use this in planning for the class as a whole and for groups.	Teacher demonstrates extensive knowledge of students’ backgrounds, skills, interests, and abilities and attempts to use this in planning for individual student learning.
Evidence:				

C. Setting Instructional Outcomes	Instructional outcomes focus on insignificant learning rather than content standards/outcomes or curricular framework. Instructional outcomes are not suitable for the diversity, age, or development levels of students.	Instructional outcomes focus on significant content standards/ outcomes or curricular framework, but are not suitable for the students in the class; they include instructional activities, some of which permit an authentic means of assessment.	Instructional outcomes focus on significant content standards/outcomes or curricular framework that are suitable for most students in the class; they reflect opportunities for integration and permit an authentic means of assessment.	Instructional outcomes reflect high-level learning related to the content standards/outcomes or curricular frameworks. They are adapted where necessary, to the needs of individual students, and permit varied and authentic methods of assessment.
Evidence:				
D. Demonstrates knowledge of resources	Teacher does not use available resources consistently for instruction or for supporting student learning.	Teacher demonstrates limited usage of available resources for instruction or for supporting student learning.	Teacher fully utilizes available resources for instruction or for supporting student learning.	Teacher seeks out additional resources to enhance and supplement instruction and for supporting student learning.
Evidence:				
E. Designs coherent Instruction	Various elements of the teacher's instructional design do not support the stated instructional goals or engage students in meaningful, relevant work; teacher's instructional plan has no evidence of designed structure.	Most of the elements of the teacher's instructional design support the stated instructional goals or engage students in meaningful, relevant work to a limited extent; teacher's instructional plan has a recognizable structure and sequence.	All of the elements of the teacher's instructional design support the stated instructional goals and engage students in meaningful, relevant work; teacher's instructional plan has a clear structure and sequence.	All the elements of the teacher's instructional design support the stated instructional goals and engage students in meaningful, relevant work; teacher's instructional plan is highly coherent, showing clear structure and sequence.

Evidence:**F. Designing Student Assessment**

Teacher's approach to assessing student learning lacks alignment with the instructional goals and contains no clear criteria or standards for student performance; assessment results are not used to design future instruction and student assessment.

Teacher's assessment plan is partially aligned with the instructional goals and includes criteria and standards for student performance that are not clear or understood by students; assessment results are used to design future instruction and checks for understanding for the whole class.

Teacher's assessment plan is aligned with the instructional goals and the criteria and standards for student performance have been clearly communicated and are understood by students; assessment results are used to design future instruction and checks for understanding for groups of students and individuals.

Teacher's assessment plan is aligned with the instructional goals; criteria and standards for student performance have been developed with student input and clearly communicated; students monitor own progress in achieving goals; assessment results are used to design future work for individual students.

Evidence:**G. Data-Driven Planning**

The teacher's lesson plans reflect little or no evidence that the instructional planning process uses data to plan for meeting students' needs.

The teacher uses minimal data in the instructional planning process.

Teacher uses data to optimize resources in the planning process.

The teacher uses data to plan appropriate curricula, implement instructional strategies, and use resources to promote learning for all students.

Evidence:

PERFORMANCE AREA II 1
Instruction

Performance Levels 2

Criteria	Beginning	Developing	Applying	Innovating
A. Communicating with Students	Teacher’s oral and written communication is unclear and/ or is inappropriate to students; does not include learning objectives or establish clear expectations.	Teacher’s oral and written communication is somewhat clear and makes an attempt to connect the learning objective with the instruction and establishes clear expectations.	Teacher’s oral and written communication is clear and appropriate to students. The communication includes learning objectives establishes clear expectations.	Teacher’s oral and written communication is clearly expressed; includes learning objectives and clear expectations, and indicates the anticipation of possible student misconceptions.
Evidence:				
B. Using Questioning and Discussion Techniques	Little use of higher-level questioning and discussion techniques to drive instruction and guide student learning. Minimal student participation.	Some use of higher questioning and discussion techniques utilized to drive instruction and guide student learning, attempts to engage students in discussion and moderate student participation.	Teacher’s use of questioning and discussion techniques reflect higher level questioning, varied ideas, and consistent participation by most students.	Teacher consistently uses higher level question and discussion techniques. Teacher’s students formulate many higher-level questions and assume responsibility for participation of all students in discussions.
Evidence:				

C. Engages students in Learning	Few students are intellectually engaged in learning as a result of ineffective activities and/or materials, lack of instruction, or lack of appropriate structure and or pacing.	Some students are intellectually engaged in learning as a result of lack of ineffective activities, instruction, structure and/or pacing.	Most students are intellectually engaged throughout the learning as a result of effective activities and materials, instructive representatives of content and suitable structure and pacing.	All students are highly engaged throughout the learning and make high-level contributions to the representation of content, the activities, and the materials; the structure and pacing of learning allow students time to reflect and have closure.
Evidence:				
D. Demonstrates Flexibility and Responsiveness	Teacher is unaware of student understanding or lacks ability to adjust instructional plan in spite of evidence of poor student understanding.	Teacher demonstrates limited flexibility and responsiveness to students' needs and interest during the learning; teacher assumes some of the responsibility for student success but does not actively seek ways to ensure successful learning for all students.	Teacher makes appropriate adjustments to instructional plans and responds to students' interest and questions during the learning; teacher actively seeks ways to ensure successful learning for all students.	Teacher is highly responsive and makes appropriate adjustments in instructional plans as a result of students' interests and questions during the learning; teacher persists in ensuring the success of all students throughout the entire lesson into the next lesson.
Evidence:				

PERFORMANCE AREA III ¹
*Professional
 Responsibilities*

Performance Levels ²

Criteria	Beginning	Developing	Applying	Innovating
A. Reflecting on Teaching	Teacher lacks the ability to self-reflect on instruction, student work, and products. Teacher struggles to bring solutions to the table for improvement.	Teacher has some ability to reflect on instruction, student work and products. Teacher can make appropriate suggestions for improvement.	Teacher's reflection on instruction, student work, and products are accurate. Teacher can cite general characteristics and make specific suggestions for improvement or alternative strategies.	Teacher's reflection on instruction, student work, and products are highly accurate and perceptive; teacher can cite specific examples and draw on extensive repertoire to suggest alternative strategies.
Evidence:				
B. Maintains Accurate Records	Teacher lacks systems for maintaining accurate records and documents resulting in confusion for students. i.e. homework system. Teacher does not make use of Campus technologies to ensure that student information is current and accurate.	Teacher has some systems for maintaining accurate records and documents resulting in organization and order for students. i.e. homework system. Teacher makes use of Campus technologies to ensure that student information is current and accurate.	Teacher has systems for maintaining accurate records and documents resulting in organization and order for students. i.e. homework system. Teacher makes use of Campus technologies to ensure that student information is current and accurate	All teacher's systems for maintaining accurate records and documents resulting in organization and order for students. i.e. homework system, are in place and function without interruption. Teacher makes use of Campus technologies to ensure that student information is current and accurate
Evidence:				

C. Communication with Families	Teacher provides little or no information to families and makes minimal attempt to engage them in the instructional program.	Teacher complies with school procedure for communicating with families and makes an effort to engage them in the instructional program; limited communication techniques are used.	Teacher communicates frequently with families and actively seeks ways to engage them in the instructional program; varied communication techniques are used.	Teacher communicates frequently and sensitively with families and successfully engages them in the instructional program; teacher uses a wide range of communication techniques, students participate in communicating with families.
Evidence:				
D. Showing Professionalism	Teacher is not alert to students' needs; teacher contributes to school practices that are self-serving or ineffective to students.	Teacher makes a genuine but inconsistent attempt to serve students' social and emotional needs; teacher generally contributes to practices that serve and support students.	Teacher makes genuine and successful efforts to serve students' needs; teacher presents a positive professional image.	Teacher assumes a leadership position to guarantee that school practices and procedures serve all students' social/emotional needs, particularly those underserved; teacher presents a professional image and serves as a positive role model for students.
Evidence:				
E. Contribution to the School/District	Teacher's relationships with colleagues, staff, and administration are removed; teacher avoids being involved in school initiatives i.e. spirit days.	Teacher maintains cordial relationships with colleagues, staff, and administration to fulfill the duties that the school requires; teacher has minimal participation in team, grade level, and school initiatives i.e. spirit days.	Teacher's support and cooperation characterizes relationships with colleagues, staff, and administration; teacher participates actively in team, grade level, and school initiatives i.e. spirit days.	Teacher makes a substantial contribution to the professional culture of the school.
Evidence:				

F. Participating in Professional Community	Teacher engages in little professional development to enhance own skills or knowledge.	Teacher participates in some required staff development activities.	Teacher participates regularly in professional development to enhance content knowledge, skills, and professional culture of the school and participates fully in all school sponsored PD.	Teacher participates regularly in professional development to enhance content knowledge, skills, and professional culture of the school and participates fully in all school sponsored PD. Teacher actively pursues own professional development outside of school.
Evidence:				
G. Utilizing Technology	Teacher incorporates little technology in preparation or delivery of instruction and provides minimal access to students as a resource; at times, teacher utilizes email, voice mail, or communicates in other ways.	Teacher occasionally incorporates technology in preparation or delivery of instruction and provides limited access to students as a resource; teacher occasionally utilizes email, voice mail, or communicates in other ways.	Teacher incorporates technology in preparation and delivery of instruction; teacher readily provides students access to technology as a resource; teacher utilizes email, voice mail, or other or communicates in other ways.	Teacher fully integrates technology in preparation and delivery of instruction; teacher ensures access to technology as a resource for students; teacher utilizes email, voice mail, or other or communicates in other ways.
Evidence:				

H. Using Assessment in Instruction	Assessment is somewhat used in instruction, either through students' awareness of the assessment criteria, monitoring of progress by teacher or students, or through feedback to students.	Assessment is occasionally used in instruction, through some monitoring of progress of learning by teacher and/or students. Feedback to students is uneven, and students are aware of only some of the assessment criteria used to evaluate their work.	Assessment is regularly used in instruction, through self-assessment by students, monitoring of progress of learning by teacher and/or students, and through high quality feedback to students. Students are fully aware of the assessment criteria used to evaluate their work.	Assessment is used in a sophisticated manner in instruction, through student involvement in establishing the assessment criteria, self-assessment by students and monitoring of progress by both students and teachers, and high-quality feedback to students from a variety of

Evidence:

Performance Area IV 4
Classroom Environment

Performance Levels 5

Criteria

Beginning

Developing

Applying 6

Innovating 7

A. Organization of Physical Space	Teachers classroom feels fairly safe and some activities are accessible to students; some furniture is arranged to support the learning environment and there is some evidence that student work is displayed; teacher has little mix of whole group, small group, and/or individual instruction.	Teacher's classroom is safe and learning activities are accessible to most students; furniture arrangement partially supports learning environment; some student work is displayed; teacher attempts to vary appropriate mix of whole group, small group, and /or individual instruction.	Teacher's classroom is safe and learning activities are accessible to all students; furniture arrangement supports learning environment; student work is displayed; teacher uses an appropriate mix of whole group, small group, and individual instruction.	Teacher's classroom is safe and learning activities are accessible to all students; furniture is deliberately arranged to supports learning activities; student work is consistently displayed and updated; teacher consistently uses a mix of whole group, small group, and individual instruction.
Evidence:				

B. Managing Classroom procedures	Some classroom routines and procedures are existent with some loss of instructional time.	Classroom routines and procedures have been established but function inconsistently, with some loss of instructional time.	Classroom routines and procedures have been established by the teacher and function smoothly with little loss of instructional time.	Classroom routines and procedures have been established with student input and are consistent in their operation; with students assuming considerable responsibility for their implementation.
Evidence:				

C. Establish a Culture for Learning	The classroom does not consistently reflect an established culture for learning; teacher displays some commitment to content, and has moderate student expectations.	Classroom environment reflects an established culture for learning, teacher displays little commitment to content, modest student expectations, inconsistent student expectations, and students are performing at the minimal level.	Classroom environment reflects a positive culture for learning where teacher displays a commitment to the content, high expectations for student achievement, and students are persistent and take pride in their work.	Classroom environment reflects a genuine culture for learning. Students assume much of the responsibility for the culture by persisting and taking pride in their work, initiating improvements to their products, and holding their work to the highest standards.
Evidence:				
D. Creating an Environment of Respect and Rapport	Interactions in teacher's classroom among students/teacher are inconsistent, without much evidence of positive character being shown.	Interactions in teacher's classroom are generally appropriate and classmates show positive character towards each other.	Interactions in teacher's classroom reflect general warmth and caring and are respectful of the culture and developmental differences among groups of students. Positive character among classmates is evident.	Interactions in teacher's classroom are highly respectful, reflecting genuine warmth and caring towards individuals. Students themselves ensure maintenance of high levels of positive character among classmates.

Evidence:

E. Managing Student Behavior	Student behavior in classroom is inconsistent; teacher has established no clear expectations, some monitoring of student behavior is evident, and responses to students is inconsistent.	Student behavior in classroom is somewhat consistent. Teacher makes an effort to establish clear expectations for students, to monitor student behavior and to appropriately respond to student misbehavior consistently.	Student behavior in classroom is consistently correct. Teacher is aware of student behavior, has established clear expectations and responds to student misbehavior appropriately, respectfully, and logically.	Student behavior in the classroom is entirely appropriate with evidence of student participation in setting expectations and monitoring of behavior. Teacher monitoring is subtle and preventative responses to students' misbehavior are sensitive to individual students needs.
Evidence:
